Russell Gonzales

Vancouver, BC | 778.555.1955 | russell.gonzales14@gmail.com | https://rgonzales14.github.io

TECHNICAL SKILLS

- **Languages:** Python, Java, C, C++, SQL, TypeScript
- **Tools & Platforms:** Git, Android Studio, HarmonyOS DevEco Studio, Linux/Unix, JIRA, Markdown
- **Machine Learning & AI:** model evaluation, TensorFlow Lite, ONNX, PyTorch Mobile, pandas
- **Other Skills:** code refractoring, documentation, reporting, cross-functional teamwork, time management

EDUCATION

Bachelor of Applied Science, Computer Engineering (GPA 4.0/4.33) Sep 2022 – Present

University of British Columbia – Vancouver, BC

- **Relevant Coursework:** Software Construction, Algorithm Design and Analysis, Mobile Application Development, AI Fundamentals, Introduction to Computer Security, Operating Systems, Software Testing, Relational Databases
- **Activities:** UBC Google Developers Student Club, UBC AI Club, UBC Alpha Kappa Psi Co-Ed Fraternity

RELEVANT EXPERIENCE

React Native Developer Jan 2024 – Present

UBC Launch Pad, Mobile Development Team – Vancouver, BC

- Developed and maintained a cross-platform mobile app using TypeScript and Firebase, reaching 500+ student users in its first month.
- Improved app responsiveness by 40% through performance optimizations such as lazy loading and memorization
- Participated in Agile sprints and peer code reviews, contributing to a 10-member cross-functional team.
- Implemented a modular architecture using Redux for state management

Software Developer Intern May 2023 – Aug 2023

NeuroLink AI Solutions – Richmond, BC

- Refactored and modularized legacy Android codebase using Java and Git, reducing build times by 25.
- Deployed quantized CNNs using TensorFlow Lite models on devices, enabling real-time health anomaly detection with <200ms latency.
- Collaborated with researchers and mobile engineers to integrate AI features into a HarmonyOS prototype app, contributing to 3 successful feature releases.
- Leveraged strong organizational skills through the documentation of system architecture and deployment workflows using Markdown and JIRA, streamlining onboarding for future interns.

TECHNICAL PROJECTS

Smart Campus Navigation App Sep 2023 – Dec 2023

Course Project, Software Construction – Vancouver, BC

- Built an Android app in Java using Google Maps API to assist students in navigating UBC's campus, achieving 95% accuracy in user testing.
- Integrated real-time crowd density data and QR code scanning, reducing average route congestion by 30%.
- Applied MVC architecture and wrote unit tests with JUnit to ensure code quality and maintainability.

AI-Powered Study Assistant Oct 2022 – Dec 2022

Independent Project – Vancouver, BC

- Built a Telegram chatbot using Python and GPT API; trained an 85%-accurate intent classifier with scikit-learn.
- Deployed the assistant on a cloud server and published it on GitHub, earning 20+ stars and user feedback.

AWARDS AND RECOGNITIONS

- Richard S. Hallisey Scholarship in Engineering ($1500) for academic achievement 2023
- Presidential Scholars Award ($5000/year) for academic and leadership 2022 – 2024

Intern Software Engineer

Huawei Canada – Markham, Ontario

JOB DESCRIPTION

Huawei Canada has an immediate 6 months Internship opening for a Software Engineer.

About the team:

Founded in 2012, the Noah's Ark lab has evolved into a prominent research organization with notable achievements in academia and industry. The lab's mission focuses on advancing artificial intelligence and related fields to benefit the company and society. Driven by impactful, long-term projects, the aim is to enhance state-of-the-art research while integrating innovations into the company's products and services, including LLMs, RL, NLP, computer vision, AI theory, and Autonomous driving.

About the job:

- Analyze and refactor source code from research prototypes.
- Implement and test new features on Android or HarmonyOS demo apps.
- Deploy AI models and research outcomes onto Huawei mobile devices.
- Collaborate closely with cross-functional teams to integrate research outcomes into Huawei's mobile system.

JOB REQUIREMENTS

About the ideal candidate:

- In pursuit of BS or MS or Phd in Computer Science, Electrical Engineering, Computer Engineering, Software Engineering or Telecommunications.
- Proficient in at least one of the following programming languages: C/C++, Python, Java.
- Knowledge of Machine Learning.
- Excellent team player; strong collaboration and communication skills.
- Excellent documentation and organization skills.
- Knowledge of mobile development such as Android and IOS is an assets.
